EXPERIENCE

TEST TECHNICIAN

IBM | Guadalajara, Jalisco

Aug/04 / 2023 – Oct /04/ 2023

Logging server input and output operations used for software and hardware testing

PROJECTS (IMPORTANTS)

El asador de Richard | TypeScript, Nextjs

GitHub: POS System for Poultry Shops. Records sales, manages inventory, processes payments, and generates reports. Open-source, collaborative tool for efficient business management.

Nebula| Java

Nebula is a compiled language with a user-friendly syntax similar to Python, accompanied by its dedicated text editor for coding convenience.

Cervecería | C#

C# brewery management system project with a graphical interface and SQL database connectivity. Streamlines beer-related data operations such as addition, deletion, search, and editing.

Intelligent Recognition| Python

A registration and login application utilizing facial recognition and audio comparison for user authentication.

EDUCATION
